## Lead Engineer - Drainage - (BIA00084P)

Your Impact:

At Jacobs, we push the limits of what's possible to make the world smarter, more connected and more sustainable. In our transport work, that means designing innovative solutions to move people and goods safely and efficiently across the globe. From rail systems mobilising accessible transit, to ports linking land and sea – when it comes to connecting the people and places of tomorrow, the future of transport depends on us.

Bring your curiosity, talent for multi-tasking, and extreme attention to detail, and we'll help you grow, pursue and fulfill what drives you – so we can make big impacts on the world, together.

Motivated and experienced Road Design Engineers who can utilise their strong technical and project management skills to deliver highways-related infrastructure projects.

As a Senior member of the high performing team, you will be given the opportunity to lead project teams and contribute your expertise to world-class projects, developing technical designs and delivery models for various highway upgrades, rural roads and urban roads projects.

This role will see you working with multi-disciplined engineers and designers in a fast-paced environment whilst supporting a strong pipeline of existing projects, ranging in size and scope, as well as working on several major pursuits in order to continue the projected growth of our business.

Technical competence in detailed highways geometry design using MX Road/Civil 3D/Open Road Designer and able to independently deliver work and integrate with larger project team.

Clear knowledge of work procedures, and ability to brief project team on them and responsible for completion of projects to time and cost. Assists in the leadership of functional teams or projects. Communicating with counterpart in lead office/Client and Coordinate with multi-disciplinary teams on project delivery. Able to realistically estimate pricing associated with projects within their area of expertise. Self-discipline and able to manage own daily work allocation as well as team members

Here's What You'll Need:

Minimum 12-18 years of proven drainage design experience with software proficiency in Open Roads or Windes Microdrainage or Civil3D.

Exposure to other software tools (Sewergems , 12D and Navisworks) and relevant design standards (DMRB/ SUDS /AusRoads preferable.

Jacobs A world where you can

From our inclusive employee networks, to our positive mental health champions – we're committed to driving a culture of caring where you can be you.
