## Airfield Design Engineer [Apply](#) →

As the aviation industry continues on a path to recovery we are expanding our Aviation Global Technology Centre team to ensure we can continue to support our clients as they implement their development plans alongside their existing asset management initiatives.

We have maintained our delivery capability to our clients during the pandemic and following some key project and framework wins we are now looking to strengthen our team and have a number of positions available.

We are therefore looking for an Airfield Design Engineer to join our growing internationally respected Aviation team based in our Mumbai Office.

We can offer individuals exciting opportunities to support on a wide range of international airport projects. We are well established at all major international Airports and have a growing portfolio of overseas commissions.

We are looking for a Civil Engineer with experience in designing, coordinating and delivering projects in an airport environment. The candidate would be a Civil Engineer with airfield and infrastructure design experience, including successful delivery of schemes from concept to detailed design. The position requires credibility, competence and technical excellence as it will be a role working closely with industry leading clients, stakeholders and will necessitate the development, approval and implementation of robust design solutions through collaborative working, trust and proactive management of client demands.

You will join a group of passionate industry experts within an already well-established team. For those individuals that are capable and motivated, we aim to provide an environment offering opportunities for your development and growth as well as providing you with support in formulating your career ambitions.
